SPARTA, NJ – Robert S. Ruppert of Hawthorne has joined CP Engineers, Architecture & Life Sciences in Sparta as a Senior Project Engineer. Ruppert adds strength and diversity to the firm's Water/Wastewater practice.

Ruppert holds over 30 years of experience in environmental studies, water supply, water distribution, water system modeling, water and wastewater treatment plant design, sewer design, sewer rehabilitation, site planning, drainage development, site plan review, landfill closure, and numerous ancillary facilities on treatment plant sites. Areas of expertise include: Hardy Cross analysis, plant layout, plant hydraulic studies, equipment selection, site development, specifications, cost estimation, utility coordination, operations and maintenance, water supply, facilities planning, instrumentation, coordination of trades and subcontractors, computer-aided design (CAD) and support, project management, permit applications, shop drawing review and construction supervision.

"We are very pleased that Robert has joined our team," Steve Donati, Vice-President of Engineering, said. "Robert has a diversified range of expertise in the engineering field, which can benefit our clients in our Water/Wastewater practice. We look forward to offering these clients further services that Robert is versed in."

Ruppert has a Bachelor of Engineering Degree in Civil Engineering from Stevens Institute of Technology, with a specialty in water and wastewater. His experiences cover a broad range, and entail projects recognized for their innovation and technical excellence.
